

Dear Sirs:

It has come to my attention that there is a petition, 04-160, that suggest that you regulate and limit the use of satellite radio's ability to provide local traffic and weather. It saddens me to know that the National Associaton of Broadcasters (NAB) is lobbying against the 1st amendment of the Constitution. These services provide great benefit to me and countless others. Information about traffic and weather should not be the property of the NAB. The NAB, FCC, Congress, or anyone for that matter should be able to dictate to the American public how the can gather information on traffic and weather. If this passes will I still be able to get weather information on the internet? Where will this stop. This petition should be denied and I request that you do so. If the NAB want a greater share of the market then they should improve there service much like the way I do in my business.

Sincerely,

Clay Hilyer
